# **New FPS Video Celebrates the Work of the Processing Industry During the Pandemic**

**Richmond, BC** – FPS Food Processes Solutions has just released a video acknowledging and celebrating the critical work role food processing plays in our society.

COVID-19 continues to create enormous stress on our society and our industry in particular. While some industries shut down, the food processing industry has persevered – because there is no other option. Within weeks of the outbreak, the concept of essential became crystal clear. Safe, clean, processed food is ESSENTIAL.

Based in Canada, our work of building and maintaining equipment is done mostly in the background. However, we are acutely aware of the inter-connected global effort that it takes to bring food to market. Without food processors, producers such as farmers and fisherman could not get their goods to market. We - all of us - are the difference between access to food and empty store shelves. FPS is proud to be part of an industry that has met and continues to rise to meet this challenge.

"From its inception, FPS has been driven to create equipment with the absolute highest level of hygienic standards. So, while the pandemic has altered how we work, it has reaffirmed our mission and reinforced our sense of pride in our industry," states Justin Lai, FPS VP of Marketing & Sales.

"We created this video to say thank you to all of the partners that stand alongside us in delivering safe food to people and families across the globe. We couldn't do what we do without them," explains Lai.

As we continue to face the issues brought on by the pandemic, we also look to other challenges including climate change, food waste and hygienic production. FPS is confident that collectively through innovation, collaboration and ongoing investment, our industry will rise to meet any challenge.

## **ABOUT FPS Food Process Solutions:**

### **Who We Are**

FPS Food Process Solutions is based in Richmond, BC, Canada about 5 miles away from Vancouver. We maintain sheet metal fabrication, a machine shop, specialized insulated enclosure manufacturing and control panel assembly in-house so each component is specifically

designed for freezing and cooling applications. We believe that investing on in-house manufacturing ensures our customers receive the highest quality and best technologies in their freezing and cooling equipment.

FPS has a combined 28,000 sq. meters (304,500 sq. ft.) of space, including our headquarters, 5 manufacturing facilities, international sales offices and a US based parts & service center.

**Our Vision is to *Revolutionize Hygienic Standards***

We use the most leading-edge technology and innovation to move our industry forward. Our focus on hygiene is the foundation for safe food production. Our purpose is to revolutionize the food processing industry, and ensure the safest and cleanest global food production for all.

**Our Mission is to *Set a New Standard***

We invest in our people and partners. We believe the best results come from strong collaborations. We aim to raise the bar in our field by providing close client relationships, offer outstanding levels of service, and implement global hygienic standards. We believe that together, we will set a new standard.
